FUND OVERVIEW

The Fund seeks to track the performance of an index composed of listed real estate companies and Real Estate Investment Trusts (REITS) from developed countries, excluding Greece, which also comply with dividend yield criteria.

KEY BENEFITS

- 1. Exposure to developed markets real estate companies with a one-year forecast dividend yield of 2%
- 2. Direct investment into listed real estate companies and REITS
- 3. Regional exposure with a focus on income

CAPITAL AT RISK: The value of investments and the income from them can fall as well as rise and are not guaranteed. Investors may not get back the amount originally invested.

KEY RISKS:

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Investments in property securities can be affected by the general performance of stock markets and the property sector. In particular, changing interest rates can affect the value of properties in which a property company invests.
- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.
