

This is a marketing communication. Please refer to the prospectus of the funds and to the key information document before making any investment decision.

The quality of the ranking, award or label obtained by the fund or the management company depends on the quality of the issuing institution and the ranking, award or label does not guarantee the future results of the fund or the management company.

REPORTING 29|03|2024

IndexIQ Factors Sustainable EMU Equity

Share Class: UCITS ETF (EUR)

Risk indicator

The summary risk indicator ("SRI") is an indicator with a rating ranging from 1 to 7 and corresponds to increasing levels of risk and return. The methodology for calculating this regulatory indicator is available in the KID. The summary risk indicator ("SRI") is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

- The SRI assumes you keep the product for 6 years.
- The actual risk can vary significantly if you cash in at an early stage and you may get less back.
- This product does not include any protection from future market performance. Please refer to the "Risk" section of the prospectus for more details

Investment strategy

IndexIQ Factors Sustainable EMU Equity, a sub-fund of the IndexIQ sicav, seeks to track the performance of the Solactive® Candriam Factors Sustainable EMU Equity Index (the Index) mainly by making direct investments in transferable securities representing most of the underlying components of the Index (physical replication). For a maximum of 10% of its assets, the Fund may invest in other transferable securities and/or other eligible assets. The fund is passively managed, with reference to the index mentioned below. For further information about this index and its use, please consult the fund's key information document (KID).

Performance

Past Performances does not predict future returns. See important disclosures on performance under the section 'warning' in the 'Important Information' on page 4. NAVs are net of fees and are provided by the accounting department and the reference index by official providers.

This graph represents the synthetic net asset value of the fund. It is provided for information and illustrative purposes only. The synthetic net asset value is obtained by a recalculation of the values of the fund's assets by leveling out the effect of securities transactions (split, coupon, dividend distribution...) in order to reflect the real performance of the fund share or unit. Data may be rounded for convenience. Data expressed in a currency other than that of the investor's country of residence is subject to exchange rate fluctuations, with a positive or negative impact. Gross performance may be impacted by commissions, fees and other expenses.

Important Information

This is a marketing communication. Please refer to the prospectus of the funds and to the key information document before making any investment decision. This marketing communication does not constitute an offer to buy or sell financial instruments, nor does it represent an investment recommendation or confirm any kind of transaction, except where expressly agreed. Although Candriam selects carefully the data and sources within this document, errors or omissions cannot be excluded a priori. Candriam cannot be held liable for any direct or indirect losses as a result of the use of this document. The intellectual property rights of Candriam must be respected at all times, contents of this document may not be reproduced without prior written approval.

Warning: Past performance of a given financial instrument or index or an investment service or strategy, or simulations of past performance, or forecasts of future performance does not predict future returns. Gross performances may be impacted by commissions, fees and other expenses. Performances expressed in a currency other than that of the investor's country of residence are subject to exchange rate fluctuations, with a negative or positive impact on gains. If the present document refers to a specific tax treatment, such information depends on the individual situation of each investor and may change.

In respect to money market funds, please be aware that an investment in a fund is different from an investment in deposits and that the investment's principal is capable of fluctuation. The fund does not rely on external support for guaranteeing its liquidity or stabilizing its NAV per unit or share. The risk of loss of the principal is borne by the investor.

Candriam consistently recommends investors to consult via our website <https://www.candriam.com> the key information document, prospectus, and all other relevant information prior to investing in one of our funds,

including the net asset value ("NAV") of the funds. Investor rights and complaints procedure, are accessible on Candriam's dedicated regulatory webpages <https://www.candriam.com/en/professional/legal-information/regulatory-information/>. This information is available either in English or in local languages for each country where the fund's marketing is approved.

According to the applicable laws and regulations, Candriam may decide to terminate the arrangements made for the marketing of a relevant fund at any time. Information on sustainability-related aspects: the information on sustainability-related aspects contained in this communication are available on Candriam webpage <https://www.candriam.com/en/professional/sfd/>. The decision to invest in the promoted product should take into account all the characteristics or objectives of the promoted product as described in its prospectus, or in the information documents which are to be disclosed to investors in accordance with the applicable law.

Notice to investors in Switzerland: The information provided herein does not constitute an offer of financial instruments in Switzerland pursuant to the Swiss Financial Services Act ("FinSA") and its implementing ordinance. This is solely an advertisement pursuant to FinSA and its implementing ordinance for financial instruments. Swiss representative: CACEIS (Switzerland) SA, Route de Signy 35, CH-1260 Nyon. The legal documents as well as the latest annual and semi-annual financial reports, if any, of the investment funds may be obtained free of charge from the Swiss representative. Swiss paying agent: CACEIS Bank, Paris, succursale de Nyon/Suisse, Route de Signy, 35, CH-1260 Nyon. Place of performance: Route de Signy 35, CH-1260 Nyon. Place of jurisdiction: Route de Signy 35, CH-1260 Nyon.

Risk Profile

EFTs purchased on the secondary market cannot usually be sold directly back to the UCITS EFT. Investors must buy and sell units/shares on the secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying units/shares and may receive less than the current net asset value when selling them. For more details, please consult the relevant prospectus. To better understand the EFT's risk profile, investors are asked to consider, in addition to their risk category, the risks that are inherent to the investment strategy as described in the prospectus. Investors should be aware that the EFT's value may decrease, particularly due to its exposure to the following main risks:

-Liquidity risk: the fund may invest in securities and/or market segments which may prove to be less liquid, particularly under certain market conditions, and it may therefore be the case that the securities cannot be sold quickly and at reasonable prices.

-Sustainability risk: refers to any event or situation in the environmental, social or governance field that could affect the performance and / or reputation of issuers in the portfolio. Sustainability risk may be specific to the issuer, depending on its activities and practices, but it may also be due to external factors.

-Index tracking risk: the Fund's performance may not exactly track the index. This can result for market fluctuations, changes in the composition of the index, transaction costs, the costs of making changes to the Fund's portfolio, other Fund expenses etc.

The ETFs' strategies are not sponsored, promoted, sold or supported in any other manner by Solactive AG nor does Solactive AG offer any express or implicit guarantee or assurance either with regard to the results of using the Indexes and /or Indexes trade mark or the Indexes' Price at any time or in any other respect. The Indexes are calculated and published by Solactive AG uses its best efforts to ensure that the Indexes are calculated correctly. Irrespective of its obligations towards the Issuer, Solactive AG has no obligation to point out errors in the Indexes to third parties including but not limited to investors and/or financial intermediaries of the financial instrument. Neither publication of the Indexes by Solactive AG nor the licensing of the Indexes or Indexes trade mark for the purpose of use in connection with the financial instrument constitutes a recommendation by Solactive AG to invest capital in said financial instrument nor does it in any way represent an assurance or opinion of Solactive AG with regard to any investment in this financial instrument.

IndexIQ Advisors LLC is an affiliated entity of the Candriam and operates under the branded name "IndexIQ" as a provider of liquid alternative investment solutions focused on absolute return, real asset and international strategies. Investors should be aware that IndexIQ Advisors LLC does not provide any services to the Fund. INDEXIQ® is a registered trademark of New York Life Insurance Company in the European Union, Switzerland, United States of America, and Canada. The INDEXIQ Logo is a registered trademark of New York Life Insurance Company in the United States of America. New York Life Insurance Company also claims rights in the INDEXIQ name and mark in other jurisdictions. Both Candriam and IndexIQ Advisors LLC uses the INDEXIQ marks under license from New York Life Insurance Company.

Glossary

EXPOSURE

The Exposure of a fund is expressed as a percentage of total portfolio holdings, taking into account the leverage of derivative instruments. It represents the amount an investor can lose from the risks unique to a particular investment. The Equity Exposure is the sum of exposures to equity instruments, including derivatives.

VOLATILITY*

The Volatility is the statistical measure of dispersion of returns for a fund around the mean. A higher volatility means that a fund's value can potentially be spread out over a larger range of values and makes the fund a riskier investment.

SHARPE RATIO*

The Sharpe Ratio measures the level of compensation an investment in the fund offered for the risk taken. It is calculated by subtracting the risk-free rate from the return of the fund and dividing that result by the volatility. The higher the Sharpe ratio the better, a negative ratio has no significance other than that the fund underperformed the risk-free rate.

TRACKING ERROR*

The Tracking Error is a statistical measure of dispersion of the excess returns of the fund around the mean, making it the volatility of the difference between the fund's return and its reference index return. A higher tracking error indicates a higher deviation from the reference index.

BETA

Beta measures the sensitivity of fund returns to changes in returns of its reference index. A beta greater than 1 indicates the fund is more volatile, thus more risky than the reference index.

ALPHA

Alpha represents the performance of a fund relative to its reference index, it is often considered to represent the value that a portfolio manager adds to or subtracts from a fund's return. It is the return on a fund that is not a result of general movement in the greater market.

* based on weekly data over 3 Years (1 year if too little history)

NUMBERS OF POSITIONS

The Number of Positions represents the total number of instruments in position.

ACTIVE SHARE

It is calculated by taking the sum of the absolute value of the differences of the weight of each holding in the fund and the weight of each holding in the reference index and dividing by two. The greater the difference between the composition of the fund and its reference index, the greater the active share.

P/E RATIO

The Price/Earnings Ratio of a fund is calculated by dividing the market value of the fund by the total amount of the underlying company's realized earnings per share. Index derivatives are excluded.

P/BOOK VALUE

The Price/Book Value of a fund is calculated by dividing the market value of the fund by the total amount of the underlying company's published book value per share. Index derivatives are excluded.

RETURN ON EQUITY (ROE)

The Return on Equity is a measure of the profitability. For a fund this is calculated as the average of the underlying company's realized earnings per share divided by their published book value per share. Index derivatives are excluded.

DIVIDEND YIELD

The Dividend Yield of a fund is determined by dividing the total amount of the annual dividends received for all shares in the fund by the current market value of the fund. Index derivatives are excluded.

SCR (Solvency Capital Requirement)

Market SCR represents an estimate of the capital charge for market risk, broken down into risk sub-modules (Interest rate, Spread, Equity...), which is applicable to insurers under Solvency 2 Directive. Candriam calculations are based on the standard formula as provided by the regulation.

OCG

Ongoing charges represent all operating and management costs invoiced to the UCI net of retrocessions.

REAL MANAGEMENT FEES

The Real Management Fee is the actual percentage charge deducted from the fund's average net assets.

PERFORMANCE FEE

The Performance Fee refers to a charge on any returns that the Fund achieves above the reference index. Please refer to the Prospectus for further information.

ESG ASSESSMENT – EXCLUSION

The Exclusion filter refers to the exclusion of companies involved in harmful or controversial activities. Involvement is assessed using activity-specific revenue-based threshold levels.

ESG ASSESSMENT – NORMS-BASED

The Norms-Based analysis excludes companies which are in violation of the 10 principles of the United Nations Global Compact (UNGC). These principles cover 4 main categories: Human Rights, Labour Rights, Environment and Anti-Corruption.

ESG ASSESSMENT – POSITIVE SELECTION

The Positive selection analysis is inclusive, not exclusive. It includes only the companies with the best ESG score, obtained by evaluating their ability to manage the sustainable development issues based on a combination of specific factors material to each sector.

ESG ASSESSMENT – INTEGRATION

The Integration of ESG factors into investment decisions consists of integrating specific extra-financial factors into the financial valuation or credit assessment of securities. The factors used are selected based on their materiality in the given asset class.
