

AB American Growth Portfolio¹

OBJECTIVE & STRATEGY

The Portfolio seeks to increase the value of your investment over time through capital growth by focusing on US large-capitalization companies. The Investment Manager uses fundamental research to build a comparatively concentrated, high conviction Portfolio of securities (typically 40-60 companies) that the Investment Manager believes are of high quality and superior long-term growth characteristics (bottom-up approach). The Portfolio typically invests at least 80%, and not less than 2/3, of its assets in equity securities of companies that are organized, or have substantial business activities, in the US.

Currency-hedged share classes use hedging techniques in an attempt to reduce—but not eliminate fluctuations between the investor's holdings in a particular currency-hedged share class denominated in the investor's investing currency and the portfolio's base currency. The goal is to deliver returns that track the portfolio's base currency returns more closely.
