The goal is to deliver returns that track the portfolio's base currency returns more closely.
**Investment in the Fund entails certain risks.** Investment returns and principal value of the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund is meant as a vehicle for diversification and does not represent a complete investment program. Some of the principal risks of investing in the Fund include country risk, currency hedged share class risk, emerging markets risk, currency risk, illiquid assets risk, portfolio turnover risk, management risk, derivatives risk, borrowing risk, taxation risk, fixed income securities risk, interest rate risk, lower rated and unrated investments risk, prepayment risk, sovereign debt obligations risk, corporate debt risk and lower- or unrated securities risk. The portfolio may invest in financial derivative instruments for investment purposes in addition to hedging and/or efficient portfolio management purposes and hence this may lead to a higher volatility to the net asset value of the Portfolio.
