AB Emerging Markets Multi-Asset Portfolio¹

OBJECTIVE & STRATEGY

The Portfolio seeks to increase the value of your investment over time through a combination of income and capital growth (total return) while seeking to moderate volatility by typically investing in equity and debt securities of any credit quality from emerging market issuers. The Portfolio may also seek exposure to other asset classes such as commodities, real estate, currencies and interest rates, as well as to eligible indices, and is not limited in its exposure to equities, debt securities or currencies. The Investment Manager uses fundamental research and a proprietary quantitative analysis to flexibly adjust investment exposures across various asset classes with the goal of building an optimal risk/return portfolio in all market conditions (top-down and bottom-up approach).

STATISTICAL DATA (CLASS A USD)

	5 Years
Beta	0.85
Volatility	14.35%

#Past performance is not indicative of future results. Performance calculation are based on a single pricing basis, include the change in Net Asset Value and reinvestment of any distributions paid on Portfolio shares for the period shown, net of assumed front-end load (FEL) 4% for Class A/AD shares. For Class A/AD shares, maximum front-end load (FEL): Up to 5%. Accordingly, these figures do not represent actual returns to an investor. Performance quoted in currencies other than the base currency of the Portfolio is calculated by converting the daily Net Asset Value of the Portfolio using a spot foreign exchange rate of the other offered currency on each valuation point. Returns denominated in a currency other than that of the fund may increase or decrease as a result of foreign exchange currency fluctuations. The information on this page is for informational purposes only and should not be construed as an offer to sell, or solicitation of an offer to buy, or a recommendation for the securities of the Portfolio.

[^] Net Asset Value is denominated in the share class currency.

Currency-hedged share classes use hedging techniques in an attempt to reduce—but not eliminate fluctuations between the investor's holdings in a particular currency-hedged share class denominated in the investor's investing currency and the portfolio's base currency. The goal is to deliver returns that track the portfolio's base currency returns more closely.

Investment in the Fund entails certain risks. Investment returns and principal value of the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund may not represent a complete investment program. Some of the principal risks of investing in the Fund (risks typically associated with ordinary market conditions) include ABS/MBS risk, commodities exposure risk, concentration risk, currency risk, debt securities risk, depositary receipts risk, derivatives risk, emerging/frontier markets risk, equity securities risk, hedging risk, leverage risk, market risk, prepayment and extension risk, REIT investment risk, short position risk and small/mid-cap equities risk. The Portfolio may invest in financial derivative instruments for investment purposes in addition to hedging and/or efficient portfolio management purposes and hence this may lead to a higher volatility to the net asset value of the Portfolio. These and other risks are described in the Fund's prospectus. Prospective investors should read the prospectus and Product Highlights Sheet carefully and discuss risk and the fund's fees and charges with their financial adviser to determine if the investment is appropriate for them.
