

This Products Highlights Sheet is an important document.

- It highlights the key terms and risks of the Emerging Markets Multi-Asset Portfolio (the "Portfolio"), a portfolio of AB¹ (the "Fund"), and complements the prospectus for the Fund (the "Prospectus") and the Singapore prospectus (the "Singapore Prospectus", together with the Prospectus, the "Singapore Offering Documents").²
- It is important to read the Singapore Offering Documents before deciding whether to purchase shares in the Portfolio ("Shares"). If you do not have a copy, please contact us to ask for one.
- You should not invest in the Portfolio if you do not understand it or are not comfortable with the accompanying risks.
- If you wish to purchase Shares, you will need to make an application in the manner set out in the Singapore Prospectus.

¹ AB SICAV I (referred to as "AB" or the "Fund" in this document) is an open-ended investment company with variable capital (*société d'investissement à capital variable*) under the laws of the Grand Duchy of Luxembourg.

² The Singapore Offering Documents are available at the office of the Singapore Representative during its normal business hours or are accessible at www.alliancebernstein.com

Investment Strategy	
STRATEGY <ul style="list-style-type: none"> In actively managing the Portfolio, the Investment Manager uses fundamental research and a proprietary quantitative analysis to flexibly adjust investment exposures across various asset classes with the goal of building an optimal risk/return Portfolio in all market conditions (top-down and bottom-up approach). Under normal market conditions, the Portfolio typically invests in equity securities and debt securities of any credit quality from Emerging Market issuers. The Portfolio may also seek exposure to other asset classes such as commodities, real estate, currencies and interest rates, as well as to eligible indices. The Portfolio is not limited in its exposure to equities, debt securities or currencies. The Portfolio may utilise all markets where these equity securities are traded, including the China Connect Scheme and the China A-share and H-share equity markets of both China and offshore equity markets. Offshore equity markets include those exchanges or markets located in the US, Hong Kong, the United Kingdom, Singapore, Korea and Taiwan. The Portfolio may also invest in China through the QFI Scheme. The Portfolio's investments may include convertible securities, depositary receipts, REITs and ETFs. The Portfolio may utilise all bond markets where these debt securities are traded including Bond Connect. The Portfolio may invest up to 30% of its assets in equity or debt securities from issuers in developed markets that may benefit from opportunities in Emerging Markets, and up to 20% of its assets in structured products such as asset- and mortgage-backed securities ("ABSs/MBSSs") and collateralised debt obligations. The Portfolio may be exposed to any currency. The Portfolio uses derivatives to a significant extent for hedging (reducing risks), efficient portfolio management ("EPM"), and other investment purposes (including to gain additional exposure and to take synthetic short positions). 	Refer to "Investment Objective, Focus and Approach" and "Derivatives and Techniques" in the relevant appendix of the Singapore Prospectus for further information on the investment strategy.
Parties Involved	
WHO ARE YOU INVESTING WITH? <ul style="list-style-type: none"> The Investment Manager for the Portfolio is AllianceBernstein L.P., a Delaware limited partnership. Brown Brothers Harriman (Luxembourg) S.C.A. has been appointed to act as Administrator and Depositary. Refer to "Other Important Information" of the Singapore Prospectus for information on what happens if these entities become insolvent. 	Refer to "Fund Service Providers and Additional Resources" of the Prospectus for information on roles and responsibilities.
KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of investments and the income from them, and therefore the value of, and income from, Shares relating to the Portfolio can go down as well as up and you may not get back the amount you invest. These risk factors, among others, may cause you to lose some or all of your investment:	Refer to "Main Risks" of the Singapore Prospectus for information on investment risks of the Portfolio.
Market and Credit Risks	
<p>You are exposed to Emerging/Frontier Markets Risk. Emerging Markets, including frontier markets, are less established and more volatile than developed markets and more sensitive to challenging market conditions. Compared with developed markets, Emerging Markets involve higher risks, both as to frequency and intensity, particularly market, credit, liquidity, legal and currency risks.</p> <p>You are exposed to Currency Risk. To the extent that the Portfolio holds assets that are denominated in currencies other than its Base Currency, any changes in currency exchange rates could reduce investment gains or income, or increase investment losses, in some cases significantly. Hedging may reduce but not eliminate currency risk.</p> <p>You are exposed to Concentration/Focus Risk. To the extent that the Portfolio invests a large portion of its assets in a limited number of industries, sectors or issuers, or within a limited geographical area, it can be riskier and subject to greater volatility than a Portfolio that invests more broadly.</p>	
Liquidity Risks	
<p>The Shares are not listed and can only be realised on Business Days.</p> <p>There is no secondary market for the Shares. All realisation requests should be</p>	

<p>submitted in the manner set out in the Singapore Prospectus.</p> <p>You may not be able to redeem when a redemption limit is imposed or when redemptions are suspended. A redemption limit may be imposed if requests are received to redeem more than 10% of the Shares of the Portfolio outstanding. Further, your right to redeem may be temporarily suspended under certain circumstances as set out in the Singapore Prospectus.</p>	
<p style="text-align: center;">Product-Specific Risks</p>	
<p>You are exposed to Debt Securities Risk. The value of most bonds and other debt securities will rise when interest rates fall and will fall when interest rates rise. A bond or money market instrument could fall in price and become more volatile and less liquid if the security's credit rating or the issuer's financial health deteriorates, or the market believes it might. Debt securities carry, <i>inter alia</i>, interest rate risk, credit risk and default risk.</p> <p>You are exposed to Derivatives Risk. Derivatives are financial contracts whose value is derived from that of an underlying asset, rate or eligible index. Small movements in the value of an underlying asset, reference rate or eligible index can create large changes in the value of a derivative, making derivatives highly volatile in general and exposing the Portfolio to potential losses significantly greater than the cost of the derivative. The Portfolio may use derivatives for various reasons, such as hedging, EPM and investment purposes. Derivatives are specialised instruments that require investment techniques and risk analyses different from those associated with traditional securities. Derivatives are subject to the risks of the underlying asset(s), typically in modified and greatly amplified form, as well as carrying their own risks.</p> <p>You are exposed to ABS/MBS Risk. ABSs and MBSs may be particularly sensitive to changes in interest rates and typically carry prepayment risk, extension risk and above-average liquidity risk. MBSs and ABSs tend to be of lower credit quality than many other types of debt securities. To the extent that the underlying debts of an MBS or ABS go into default or become non-collectable, the securities based on those debts will lose some or all of their value.</p>	
<p style="text-align: center;">FEES AND CHARGES</p>	
<p>WHAT ARE THE FEES AND CHARGES OF THIS INVESTMENT?</p> <p><u>Payable directly by you*[#]</u></p> <p>Initial Sales Charge (as a percentage of the purchase price): Class A and AD Shares: Up to 5.00%. Class I, ID, I EUR H Shares: Up to 1.50%. Not applicable to other Share Classes.</p> <p>Contingent Deferred Sales Charge ("CDSC") (reflected as a percentage of the lesser of the current NAV or original cost of the Shares being redeemed and based upon the duration that such Shares are held): Class C Shares: Currently waived, but where applicable, up to 1%. Not applicable to other Share Classes.</p> <p><u>Payable by the Portfolio from invested proceeds (expressed as an annual percentage of the average daily NAV)[#]</u></p> <p>Management fee (excluding Management Company fee below) per annum: Class A and AD Shares: 1.60% (Retained by Investment Manager: 25-100%; Trailer fee paid by Investment Manager to financial adviser³: 0-75%) Class C Shares: 2.05% (Retained by Investment Manager: 20-100%; Trailer fee paid by Investment Manager to financial adviser³: 0-80%) Class I, ID and I EUR H Shares: 0.80% (Retained by Investment Manager: 75-100%; Trailer fee paid by Investment Manager to financial adviser³: 0-25%) Class S1 Shares: 0.80% (Trailer fee³ not applicable) Class S Shares: None</p> <p>Management Company fee (per annum): All Share Classes other than S and S1: 0.05%.
