# AB Low Volatility Equity Portfolio<sup>1</sup>

## OBJECTIVE & STRATEGY

The Portfolio seeks to increase the value of your investment over time through capital growth by typically investing in equity securities of companies in developed markets, as well as emerging markets, that the Investment Manager believes have lower volatility. These companies may be of any market capitalization and industry. The Investment Manager uses fundamental research and a proprietary quantitative risk/return model to select securities that appear to be high quality, to have low volatility and reasonable valuations and to offer attractive shareholder returns (bottom-up approach).

**#Past performance is not indicative of future results.** Performance calculation are based on a single pricing basis, include the change in Net Asset Value and reinvestment of any distributions paid on Portfolio shares for the period shown, net of assumed front-end load (FEL) 4% for Class A/AD shares. For Class A/AD shares, maximum front-end load (FEL): Up to 5%. Accordingly, these figures do not represent actual returns to an investor. Performance quoted in currencies other than the base currency of the Portfolio is calculated by converting the daily Net Asset Value of the Portfolio using a spot foreign exchange rate of the other offered currency on each valuation point. Returns denominated in a currency other than that of the fund may increase or decrease as a result of foreign exchange currency fluctuations. The information on this page is for informational purposes only and should not be construed as an offer to sell, or solicitation of an offer to buy, or a recommendation for the securities of the Portfolio.

<sup>1</sup> The Portfolio is part of AB SICAV I (referred to as "AB"). AB is an open-ended investment company with variable capital (société d'investissement à capital variable) under the laws of the Grand Duchy of Luxembourg. Prior to 5 February 2016, AB's legal name was ACMBernstein SICAV, its trading name was AllianceBernstein.

<sup>^</sup> Net Asset Value is denominated in the share class currency.

<sup>†</sup> Excludes sectors with no portfolio holdings.

Currency-hedged share classes use hedging techniques in an attempt to reduce—but not eliminate fluctuations between the investor's holdings in a particular currency-hedged share class denominated in the investor's investing currency and the portfolio's base currency. The goal is to deliver returns that track the portfolio's base currency returns more closely.

**Investment in the Fund entails certain risks.** Investment returns and principal value of the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund is meant as a vehicle for diversification and does not represent a complete investment program. Some of the principal risks of investing in the Fund (risks typically associated with ordinary market conditions) include convertible securities risk, currency risk, depositary receipts risk, derivatives risk, emerging/frontier markets risk, equity securities risk, hedging risk, leverage risk, market risk, securities lending risk and small/mid-cap equities risk. The Portfolio may invest in financial derivative instruments for investment purposes in addition to hedging and/or efficient portfolio management purposes and hence this may lead to a higher volatility to the net asset value of the Portfolio. These and other risks are described in the Fund's prospectus. Prospective investors should read the prospectus and Product Highlights Sheet carefully and discuss risk and the fund's fees and charges with their financial adviser to determine if the investment is appropriate for them.
