

HSBC Global Investment Funds

GLOBAL EQUITY SUSTAINABLE HEALTHCARE

Monthly report 29 February 2024 | Share class ACOGBP

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of shares of companies that may benefit from increasingly constrained healthcare budgets anywhere in the world, while promoting ESG characteristics. The Fund qualifies under Article 8 of SFDR.

Investment strategy

The Fund is actively managed. In normal market conditions, the Fund will invest at least 70% of its assets in shares (or securities similar to shares) of Sustainable Healthcare Companies of any size, that are based in, or carry out the larger part of their business activities in developed and emerging markets. The Fund will not invest in shares of companies which have material exposure, exceeding a revenue exposure threshold, to specific Excluded Activities that will not be higher than 30% of the relevant company's total revenue. The Fund can invest up to 40% in China A and China B-shares. For China A-shares, up to 20% through the Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect, and up to 20% in CAAPs. The Fund may invest in money market instruments and up to 10% of its assets in other funds, including HSBC funds. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- The Fund may be concentrated in a limited number of securities, economic sectors and/or countries and as a result, may be more volatile and have a greater risk of loss than more broadly diversified funds.

Monthly performance commentary

At country level, stock selection was positive for the month. Positive performance came from USA and Switzerland, though this was offset by negative stock selection in the UK and France.

USA Health Care security, ARCUTIS BIOTHERAPEUTICS INC with total effect 0.84% was the top contributor. Additionally, USA Health Care security, R1 RCM INC was the second largest contributor with total effect 0.42%. USA Health Care security, ESTABLISHMENT LABS HOLDINGS also contributed with total effect 0.38%.

On the other side, detractors included USA Health Care security INSPIRE MEDICAL SYSTEMS INC with total effect -0.35%, USA Health Care holding, NEUROCRINE BIOSCIENCES INC with total effect -0.31%, and USA Health Care holding, INSULET CORP with total effect -0.25%.

During this period, we opened positions in MERCK & CO. INC and NATERA INC. On the other hand we closed positions in CENTENE CORP.

Country allocation effects are residual to stock selection. At a country level, effects were positive, given an underweight exposure to Switzerland.

Risk Disclosure

- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Investment involves risk. Past performance figures shown are not indicative of future performance. Investors should read the prospectus (including the risk warnings) and the product highlights sheets, before investing. Daily price change percentage is based on bid-bid price.

Different classes may have different performances, dividend yields and expense ratios. For hedged classes, the effects of hedging will be reflected in the net asset values of such classes. Expenses arising from hedging transactions may be significant and will be borne by the relevant hedged classes. Hedged class performs the required hedging on a best efforts basis.

The above table cites the last dividend paid within the last 12 months only. Dividend is not guaranteed and may be paid out of capital, which will result in capital erosion and reduction in net asset value. A positive distribution yield does not imply a positive return. Past distribution yields and payments do not represent future distribution yields and payments. Historical payments may comprise of distributed income, capital, or both. The calculation method of annualised yield prior to August 2019 is the simple yield calculation: (dividend amount / NAV per share or units as of ex-dividend date) x n; The calculation method of annualised yield from August 2019 is the compound yield calculation: ((1 + (dividend amount / ex-dividend NAV))^n)-1, n depends on the distributing frequency. Annually distribution is 1; semi-annually distribution is 2; quarterly distribution is 4; monthly distribution is 12. The annualised dividend yield is calculated based on the dividend distribution on the relevant date with dividend reinvested, and may be higher or lower than the actual annual dividend yield. Investors and potential investors should refer to the details on dividend distributions of the Fund, which are available on HSBC Asset Management (Singapore) Limited website.
