

HSBC Global Investment Funds

GLOBAL EQUITY CLIMATE CHANGE

Monthly report 29 February 2024 | Share class ACHAUD

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of shares. In particular, the Fund invests in companies that may benefit from the transition to a low carbon economy by having a higher environmental, social and governance rating compared of its reference benchmark. The Fund qualifies under Article 8 of SFDR.

Investment strategy

The Fund is actively managed. In normal market conditions, the Fund will invest at least 70% of its assets in shares (or securities similar to shares) of companies of any size with revenue exposure to climate transition themes. The Fund invests in companies, that are based in, or carry out the larger part of their business activities in, both developed markets and emerging markets. The Fund can invest up to 20% in China A and China B-shares. For China A-shares, up to 10% through the Shanghai-Hong Kong Stock Connect and/or the Shenzhen-Hong Kong Stock Connect, and up to 10% in CAAPs. The Fund may invest up to 10% in Real Estate Investment Trusts, and may also invest up to 10% in other funds, including HSBC funds. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

Monthly performance commentary

At sector level, stock selection was negative for the month. Positive performance came from Materials and Industrials, though this was offset by negative stock selection in Information Technology and Utilities.

At country level, stock selection was negative for the month. Positive performance came from USA and Italy, though this was offset by negative stock selection in Japan and Spain.

USA Industrials security, SCHNEIDER ELECTRIC SE with total effect 0.43% was the top contributor. Additionally, USA Materials security, ECOLAB INC was the second largest contributor with total effect 0.38%. USA Industrials security, ADVANCED DRAINAGE SYSTEMS IN also contributed with total effect 0.37%.

On the other side, detractors included Spanish Utilities security EDP RENOVAVEIS SA with total effect -0.58%, USA Information Technology holding, NVIDIA CORP with total effect -0.55%, and Finnish Energy holding, NESTE OYJ with total effect -0.37%.

During this period, positions were initiated in CADENCE DESIGN SYS INC. Positions were closed in NIBE INDUSTRIER AB, and BRENNTAG SE.

Sector and Country allocation effects are residual to stock selection. At a country level, effects were negative, given an underweight exposure to Spain. At sector level, effects were positive, given an overweight exposure to Industrials.

Risk Disclosure

- Different investment styles typically go in and out of favour depending on market conditions and investor sentiment.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- The PRC taxes payable provision (at a rate of 10%) on the gross realised and unrealized capital gains derived from the disposal of or investment in PRC securities may be excessive or inadequate to meet the actual tax liabilities. Investors may be advantaged or disadvantaged depending upon the final outcome of how such gains will be taxed and when they subscribed and/or redeemed the Units of the Fund.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Investment involves risk. Past performance figures shown are not indicative of future performance. Investors should read the prospectus (including the risk warnings) and the product highlights sheets, before investing. Daily price change percentage is based on bid-bid price.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark.

ICHEUR	13 January 2021	LU2261311919	EUR	USD 1,000,000	7.38	0.750%	Accumulating

Different classes may have different performances, dividend yields and expense ratios. For hedged classes, the effects of hedging will be reflected in the net asset values of such classes. Expenses arising from hedging transactions may be significant and will be borne by the relevant hedged classes. Hedged class performs the required hedging on a best efforts basis.

The above table cites the last dividend paid within the last 12 months only. Dividend is not guaranteed and may be paid out of capital, which will result in capital erosion and reduction in net asset value. A positive distribution yield does not imply a positive return. Past distribution yields and payments do not represent future distribution yields and payments. Historical payments may comprise of distributed income, capital, or both. The calculation method of annualised yield prior to August 2019 is the simple yield calculation: (dividend amount / NAV per share or units as of ex-dividend date) x n; The calculation method of annualised yield from August 2019 is the compound yield calculation: ((1 + (dividend amount / ex-dividend NAV))^n)-1, n depends on the distributing frequency. Annually distribution is 1; semi-annually distribution is 2; quarterly distribution is 4; monthly distribution is 12. The annualised dividend yield is calculated based on the dividend distribution on the relevant date with dividend reinvested, and may be higher or lower than the actual annual dividend yield. Investors and potential investors should refer to the details on dividend distributions of the Fund, which are available on HSBC Asset Management (Singapore) Limited website.
