## ASIA ESG BOND

Monthly report 29 February 2024 | Share class AM3OGBP

### Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of Asian bonds, while promoting environmental, social and governance (ESG) characteristics. The Fund also aims to achieve a higher ESG rating than the weighted average of the constituents of its reference benchmark. The Fund qualifies under Article 8 of SFDR.

### Investment strategy

The Fund is actively managed. The Fund will invest at least 90% in investment grade and non-Investment grade bonds and unrated bonds and other similar securities issued by governments, government-related entities and supranational entities and companies that are based in Asia and will invest at least 70% in bonds and securities issued by issuers meeting certain ESG rating and lower carbon intensity criteria. The ESG and lower carbon criteria may include the exclusion of companies such as weapons and tobacco. The Fund invests mostly in bonds which are denominated in US dollars; 10% in securities issued by a single sovereign issuer with credit rating below investment grade; 10% in other funds. The Fund may invest up to: 30% in onshore Chinese bonds; 10% in convertible bonds; 10% in contingent convertible securities; 10% in asset backed securities and mortgage-backed securities; and can invest in bank deposits, money market instruments. See the Prospectus for a full description of the investment objectives and derivative usage.

### Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

## Monthly performance commentary

### Market Review

The Asia credit market posted slight positive returns in February. The US Treasury yields were up, driven by strength in labour market and inflation data as well as tepid investment demand for various Treasury auctions. Overall, 2-year treasury yields rose 41 bps while 10-year yields rose 34 bps.

High-yield (HY) bonds outperformed investment grade (IG) bonds as HY spreads tightened to a greater extent than IG spreads. Within the IG space, the best performer was China diversified, bolstered by improving sentiment in the region, as the government announced more supportive policies. Philippines quasi-sovereigns and Korean infrastructure also performed strongly. Conversely, China real estate emerged as the worst performer, mainly driven by reports of credit extension issues with a semi-SOE developer. India industrials also saw spreads widening due to downgrades from rating agencies. Singapore real estate saw spreads widen as the industry outlook deteriorated.

Turning to the HY space, China oil and gas was the top performer due to better market sentiment in the region. Singapore real estate and Hong Kong consumers also delivered strong performances. On the other hand, China real estate was the worst performer, as a major firm announced weak results. Sri Lanka quasi-sovereigns underperformed due to limited interest in the sale of a firm in the sector. China consumers also performed poorly because of a downgrade issued by a rating agency.

### Portfolio strategy

The fund returned slightly negatively and underperformed the benchmark slightly for February amid the uptick in US Treasury yields. On a relative basis, the fund's underweight in Macau gaming and selection in stronger China developers detracted from the relative returns. Conversely, the fund benefited from its overweight in India HY renewables and China HY industrials.

We are underweight the China property sector as the physical housing market remained weak given the continual decline in home sales. On the fund's allocation, the largest active sector positioning is an overweight in bank subordinated debt given their relatively defensive nature and attractive yields, particularly those from Korea, Singapore, and Japan. At the same time, we are overweight the China consumer and industrial sectors in a selective manner. We are also overweight India renewables which we expect to remain well supported by global sustainable investors. We are overweight debt from Japan, India, and Singapore. Besides, we continued to maintain MSCI ESG ratings more than 10% higher than benchmark JP Morgan ESG Index. On the other hand, we are underweight sovereign and quasi-sovereign bonds given their broadly speaking lower yields than other sectors. Similarly, we are also underweight China, Macau, and Philippines. We remained overweight in duration over the month given the downtrend trend of US Treasury yields.

### Outlook

Yields have declined since mid-October, but bonds still offer the most attractive valuations that we have seen over a decade, especially in anticipation of monetary easing by the US Federal Reserve. Under this environment, Asia bonds stand out for quality and valuation as yields are higher than other markets, which offer a downside cushion. The consistency of the credit quality of Asia investment grade (IG) issuers, leads to the stability of spreads. Fundamentals are resilient, backed by stable earnings and strong credit profiles of these Asia IG issuers. The strong macro backdrop in Asia, with strong economic growth, low inflation and pre-emptive monetary policy, will support corporates' credit matrix and restrain rating downgrades. The favourable technicals from limited supply and continuous demand will keep supporting the market.

### Ten lowest carbon intensity issuers

Risk Disclosure

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Investment involves risk. Past performance figures shown are not indicative of future performance. Investors should read the prospectus (including the risk warnings) and the product highlights sheets, before investing. Daily price change percentage is based on bid-bid price.

## Important Information

Performance is annualised when calculation period is over one year. Net of relevant prevailing sales charge on a single pricing (NAV) basis, calculated on the basis that dividends are reinvested.

This document does not constitute an offering document and should not be construed as a recommendation, an offer to sell or the solicitation of an offer to purchase or subscribe to any investment.

This document is for information only and is not an advertisement, investment recommendation, research, or advice. Any views and opinions expressed are subject to change without notice. It does not have regard to the specific investment objectives, financial situation, or needs of any specific person. Investors and potential investors should not invest in the Fund solely based on the information provided in this document and should read the prospectus (including the risk warnings) and the product highlights sheets, which are available upon request at HSBC Global Asset Management (Singapore) Limited ("AMSG") or our authorised distributors, before investing. You should seek advice from a financial adviser. Investment involves risk. Past performance of the managers and the funds, and any forecasts on the economy, stock or bond market, or economic trends that are targeted by the funds, are not indicative of future performance. The value of the units of the funds and income accruing to them, if any, may fall or rise and investor may not get back the original sum invested. Changes in rates of currency exchange may affect significantly the value of the investment. AMSG has based this document on information obtained from sources it reasonably believes to be reliable. However, AMSG does not warrant, guarantee or represent, expressly or by implication, the accuracy, validity or completeness of such information.

This document and any other document or material issued in connection with the offer or sale is not a prospectus as defined in the Securities and Futures Act, Chapter 289 of Singapore ("SFA") and has not been registered as a prospectus with the Monetary Authority of Singapore (the "MAS"). Accordingly, statutory liability under the SFA in relation to the content of prospectuses does not apply. You should consider carefully whether the investment is suitable for you. The offer or invitation of the Units, which is the subject of this document, does not relate to a collective investment scheme which is authorised by the MAS under Section 286 of the SFA or recognised by the MAS under Section 287 of the SFA and the Units are not allowed to be offered to the retail public.

No document or material in connection with the offer or sale of the Units may be circulated or distributed, nor may the Units be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (i) to an institutional investor pursuant to Section 304 of the SFA, in accordance with the conditions specified in that section, (ii) to a relevant person pursuant to Section 305(1), or any person pursuant to Section 305(2), and in accordance with the conditions specified in Section 305 of the SFA, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where the Units are subscribed or purchased under Section 305 of the SFA by a relevant person which is (a) a corporation (which is not an accredited investor (as defined in Section 4A of the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or (b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor, the securities (as defined in Section 239(1) of the SFA) of that corporation or the beneficiaries' rights and interest (howsoever described) in that trust shall not be transferable within 6 months after that corporation or that trust has acquired the Units pursuant to an offer made under Section 305 of the SFA except (1) to an institutional investor or to a relevant person as defined in Section 305(5) of the SFA, or to any person arising from an offer referred to in Section 275(1A) or Section 305A(3)(i)(B) of the SFA; (2) where no consideration is or will be given for the transfer; (3) where the transfer is by operation of law; or (4) as specified in Section 305A(5) of the SFA; (5) The sub-fund uses financial derivative instruments significantly and a significant portion of the sub-fund's payout income are generated from financial derivative strategies, investors should take note of expected risks associated with such strategies and higher volatility in payout income profile.

Different classes may have different performances, dividend yields and expense ratios. For hedged classes, the effects of hedging will be reflected in the net asset values of such classes. Expenses arising from hedging transactions may be significant and will be borne by the relevant hedged classes. Hedged class performs the required hedging on a best efforts basis.

The above table cites the last dividend paid within the last 12 months only. Dividend is not guaranteed and may be paid out of capital, which will result in capital erosion and reduction in net asset value. A positive distribution yield does not imply a positive return. Past distribution yields and payments do not represent future distribution yields and payments. Historical payments may comprise of distributed income, capital, or both. The calculation method of annualised yield prior to August 2019 is the simple yield calculation: (dividend amount / NAV per share or units as of ex-dividend date) x n; The calculation method of annualised yield from August 2019 is the compound yield calculation: ((1 + (dividend amount / ex-dividend NAV))^n)-1, n depends on the distributing frequency. Annually distribution is 1; semi-annually distribution is 2; quarterly distribution is 4; monthly distribution is 12. The annualised dividend yield is calculated based on the dividend distribution on the relevant date with dividend reinvested, and may be higher or lower than the actual annual dividend yield. Investors and potential investors should refer to the details on dividend distributions of the Fund, which are available on HSBC Asset Management (Singapore) Limited website.
