Market and Credit Risks

Product-Specific Risks			
<ul style="list-style-type: none">You are exposed to bonds risks. Funds investing in Bonds will be exposed to credit risk. Investing in Emerging Markets may involve risks in addition to and greater than those generally associated with investing in the securities markets of developed countries. For instance, Emerging Markets may have less developed legal and accounting systems than those in developed countries. The governments of these countries may be less stable and more likely to impose capital controls, nationalize a company or industry, place restrictions on foreign ownership and on withdrawing sale proceeds of securities from the country, and/or impose punitive taxes that could adversely affect the prices of securities.You are exposed to OTC Markets risks. The Fund may invest in securities that are actively traded in an OTC market.
