What are the key risks?

Investment involves risks. Please refer to the Explanatory Memorandum for details including the risk factors.

- Investment risk** — The Sub-Fund's investment portfolio may fall in value due to any of the key risk factors and therefore your investment in the Sub-Fund may suffer losses. There is no guarantee of the repayment of principal.
- Currency risk** — Underlying investments of the Sub-Fund may be denominated in currencies other than the base currency of the Sub-Fund. Also, a class of units may be designated in a currency other than the base currency of the Sub-Fund. The NAV of the Sub-Fund may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.
- Concentration risk** — The Sub-Fund invests in companies with exposure to a single country and the value of the Sub-Fund may be more volatile than Sub-Funds having a more diverse portfolio of investments. Additionally, the value of the Sub-Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the single country or regional markets.

What are the key risks? (con't)

- 4. Market risk** — The Sub-Fund's investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors, which may affect the NAV of the Sub-Fund.
- 5. Dividend paid effectively out of capital** — In respect of the R6 Class Units, the Fund Manager may at its discretion pay dividend out of gross income while paying all or part of the fees and expenses attributable to the R6 Class Units out of the capital of such Units, resulting in an increase in distributable income for the payment of dividend in respect of the R6 Class Units and therefore, the Sub-Fund may effectively pay dividend out of capital. This amounts to a return or withdrawal of part of a Unitholder's original investment in the R6 Class Units or from capital gains attributable to that original investment. Any distributions involving payment of dividend effectively out of the capital of the R6 Class Units may result in an immediate reduction of its NAV per unit.
- 6. Emerging market risks** — Investment in the China equity markets may involve special risks not typically associated with investment in more developed markets, such as liquidity risks, currency risks, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
- 7. Risks associated with investment in China A-Shares through stock connect programmes** — The relevant rules and regulations on the stock connect securities trading and clearing linked programmes ("Stock Connect") are subject to change which may have potential retrospective effect. The Stock Connect programmes are subject to quota limitations. Where a suspension in the trading through the programme is effected, the Sub-Fund's ability to invest in China A-shares or access the PRC market through the programme will be adversely affected. In such event, the Sub-Fund's ability to achieve its investment objective could be negatively affected.
