WHAT IS THIS PRODUCT?

FTGF ClearBridge US Aggressive Growth Fund (the "Fund") is a sub-fund of Franklin Templeton Global Funds Plc, which is constituted in the form of a mutual fund. It is domiciled in Ireland and its home regulator is the Central Bank of Ireland.

OBJECTIVE AND INVESTMENT STRATEGY

Objective: The Fund seeks to generate long-term capital appreciation.

Strategy: The Fund invests at least 70% of its net asset value in common stocks of US Companies which are listed or traded on regulated markets in the United States and that the Investment Manager believes are experiencing, or have potential to experience, growth of earnings and/or cash flow that exceed the average earnings and/or cash flow growth rate of companies having securities

included in the S&P 500 Index. The Fund may invest in the securities of small, medium and large companies offering prospects of long-term earnings growth and/or cash flow without a specific target weighting for company size.

The Fund may also invest in convertible securities, preferred stocks, warrants and Rule 144A securities, money market instruments and mortgage backed or asset backed securities, securities of non-US issuers or non-US companies (including depositary receipts) and collective investment schemes.

USE OF DERIVATIVES/ INVESTMENT IN DERIVATIVES:

The Fund's net derivative exposure¹ may be up to 50% of the Fund's net asset value.

¹ Please refer to the offering document for details regarding the calculation methodology of net derivative exposure.

WHAT ARE THE KEY RISKS?

Investment involves risks. Please refer to the offering document for details including the risk factors.

- **Equity Market Risk:** Investing in equity market is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors. Adverse developments or perceived adverse developments in one or more of these areas could cause a substantial decline in the value of equity securities owned by, hence a substantial loss to, the Fund.
- **US Markets Risk:** This Fund invests primarily in the United States, which means that it is more sensitive to local economic, market, political or regulatory events in the United States, and will be more affected by these events than other funds that invest in a broader range of regions.
- **Smaller Company Risk:** Securities of smaller companies generally are less liquid and more volatile than those of larger companies; and smaller companies generally are more likely to be adversely affected by poor economic or market conditions. These factors may adversely affect the value of the securities owned by, hence a substantial loss to, the Fund.
- **Concentration Risk:** This Fund may select fewer securities, countries or regions in which to invest and this concentration carries more risk than funds investing in a larger number of securities, countries or regions. This can increase the volatility of the Fund than that of a fund having a more diverse portfolio of investments and risk of loss to the Fund.
- **Custody and Settlement Risks:** The Fund may invest in markets where custodial and/or settlement systems are not fully developed. Such investments may be subject to additional risks with respect to the safe keeping of assets and making of investments, hence the Fund may suffer a substantial loss.
- **Currency Risk:** Fluctuations in exchange rates between the currency of the underlying securities and the Fund's base currency may adversely affect the value of an investment and any income derived from it. In addition, the value of your investment may fall due to changes in the exchange rate between the currency of your share class and the base currency of the Fund. With respect to any share class with "(Hedged)" in its name, the Fund will attempt to hedge the currency risk between the base currency of the Fund and the currency of the share class, although there can be no guarantee that it will be successful in doing so. The use of share class hedging strategies may substantially limit shareholders in the relevant Hedged Share Class from benefiting if the currency of the Hedged Share Class falls against the base currency and/or the currencies that are significant to the Fund's investment strategy, as applicable. Any hedging transactions, while potentially reducing the currency risks to which the Fund would otherwise be exposed, may involve certain other risks, including the risk of a default by a counterparty, and the risk that the Fund's forecast with respect to currency movements is incorrect. If the abovementioned hedging transactions become ineffective, the Fund may suffer a substantial loss.
- **Derivatives Risks:** This Fund may use certain types of financial derivative instruments (FDIs). These instruments may involve a higher degree of risk including but not limited to counterparty, volatility, liquidity, leverage and valuation risks, and the Fund may suffer a substantial loss. There is no guarantee that the performance of FDIs will result in a positive effect to the Fund.
- **Debt Securities Risk:** Investments in debt securities are subject to risks such as credit risk, market risk, liquidity risk, interest rate risk, valuation risk and pricing volatility, which may cause substantial losses to the Fund. The prices of debt securities

fluctuate in response to perceptions of the issuer's creditworthiness and also tend to vary inversely with market interest rates. Generally, and in the absence of hedging measures, the longer the average weighted duration of a fund, the greater the sensitivity to interest rates. Investment Grade securities may be subject to the risk of being downgraded to below Investment Grade. Debt securities rated below Investment Grade are deemed by rating agencies to be predominantly speculative with respect to the issuer's capacity to pay interest and repay principal and may involve major risk of exposure to adverse conditions.

- **Investment Risk:** The value of investments in the Fund and the income from them can go down as well as up, and investors may not get back the amount originally invested and may suffer a substantial loss to their investments. Past performance is no guide to future returns and may not be repeated. There is no guarantee of the repayment of principal.

HOW HAS THE FUND PERFORMED?

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the Class A US\$ Accumulating* increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- Fund launch date: 2007.
- Class A US\$ Accumulating* launch date: 2007.
- Effective 31 March 2020, the benchmark of the Fund was changed from Russell 3000 Growth Index to Russell 3000 Growth Index and S&P 500 Index. The Russell 3000 Growth Index is considered the Fund's primary benchmark because it consists of growth securities, which is aligned with the Investment Manager's focus on growth securities in managing the Fund. The performance of the S&P 500 Index may also be provided because it is considered a proxy for the US equity market. Please note that only the benchmark performance of the primary benchmark is illustrated in the chart above.

* This share class is a representative share class of the Fund as it represents the total return on the Fund's investment strategy and is the most widely available share class in Hong Kong.
