### Objective and investment strategy 目標及投資策略

To provide income by investing primarily in debt securities.

The Fund seeks to achieve its objective by investing opportunistically across multiple debt markets and sectors that the Investment Manager believes have high potential to produce risk adjusted return, whilst also seeking to benefit from capital growth opportunities. The Fund will invest through active management to exploit the opportunities in the respective markets. Research teams review fundamentals, technicals and valuation metrics by comparing the income against the risk level to identify debt markets and sectors with a high potential to produce risk adjusted return. Exposures to certain countries, sectors, currencies and credit ratings of debt securities may vary and may be concentrated from time to time.

At least 67% of assets invested in debt securities issued in developed and emerging markets such as debt securities issued by governments and their agencies, state and provincial governmental entities and supranational organisations, corporate debt securities, asset-backed securities ("ABS"), mortgage-backed securities ("MBS") and covered bonds. Issuers may be located anywhere in the world, including emerging markets (excluding onshore or offshore debt securities of the PRC).

The Fund may invest up to 70% of its assets in MBS and/or ABS of any credit quality. MBS which may be agency (issued by quasi US government agencies) and non-agency (issued by private institutions) refers to debt securities that are backed by mortgages, including residential and commercial mortgages, and ABS refers to those that are backed by other types of assets such as credit card debt, car loans, consumer loans and equipment leases.

The Fund may invest in investment grade, below investment grade<sup>1</sup> and unrated debt securities. There are no credit quality or maturity restrictions with respect to the debt securities in which the Fund may invest.

The Investment Manager will manage the income of the Fund to help minimise fluctuations in periodic dividend payments, which refer to the payments made by the Fund in respect of the relevant share classes.

The Fund may invest in assets denominated in any currency.

The Fund may invest up to 25% of assets in convertible securities, up to 10% of assets in equities, including preferred securities and Real Estate Investment Trusts and up to 10% of assets in contingent convertible bonds.

The Fund will not invest in onshore or offshore PRC debt securities.

The Fund may invest up to 10% of its net asset value in instruments with loss absorption features (e.g. contingent convertible securities and certain types of senior non-preferred debt).

The Fund may invest up to 20% of net assets in Ancillary Liquid Assets<sup>2</sup> for managing cash subscriptions and redemptions as well as current and exceptional payments.

The Fund may invest in Deposits with Credit Institutions<sup>3</sup>, money market instruments and money market funds for investment purposes. The Fund may hold up to 100% of its assets in these instruments on a temporary basis for defensive purposes. Such circumstances may include, but not limited to, at times of high risk due to prevailing geo-political, economic, financial and/or other market circumstances.

The Fund may invest up to 100% of net assets in Ancillary Liquid Assets<sup>2</sup> for defensive purposes on a temporary basis, if justified by exceptionally unfavourable market conditions.

The Fund will not invest more than 10% of its net asset value in securities issued or guaranteed by any single country (including its government, a public or local authority of that country) with a credit rating below investment grade.

The Fund may use financial derivative instruments for efficient portfolio management and hedging purposes.

Note: "% of assets" in this investment policy does not include Ancillary Liquid Assets.

<sup>1</sup> Securities rated Ba1/BB+ or lower using the highest rating available from one of the independent ratings agencies e.g. Standard & Poor's, Moody's or Fitch are considered below investment grade.

<sup>2</sup> Ancillary Liquid Assets mean bank deposits at sight, such as cash held in current accounts with a bank accessible at any time.

### What are the KEY RISKS? 本基金有哪些主要風險？

**Investment involves risk. Please refer to the offering document(s) for details, including the risk factors.**

**投資涉及風險。請參閱銷售文件所載詳情，包括風險因素。**

- **Investment risk** – The Fund's investment portfolio may fall in value due to any of the key risk factors below and therefore your investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.
- **Emerging markets risk** – Emerging markets may be subject to increased risks and special considerations not typically associated with investment in more developed markets, such as liquidity risks, currency risks/control, political, regulatory and economic instability, legal and taxation risks, less developed custody and settlement practices, poor transparency, greater financial risks, government restrictions on the repatriation of monies or other currency control Regulation and the likelihood of a high degree of volatility. Some markets may carry higher risks for investors who should therefore ensure that they understand the risks involved and are satisfied that an investment is suitable as part of their portfolio. As a result, investors may get back less than they originally invested.

- **Risks associated with debt securities** – the Fund’s investments in debt securities are subject to the following risks:
  - **Below investment grade/unrated investment risk** – The Fund may invest in debt securities which are unrated or with ratings below investment grade by international accredited rating agencies. Accordingly, such investment will be accompanied by a higher degree of credit and liquidity risks than is present with investment in higher rated securities. During economic downturns such bonds typically fall more in value than investment grade bonds as such are often subject to a higher risk of issuer default. The net asset value of the Fund may decline or be negatively affected if there is a default of any of the below investment grade/unrated debt securities (e.g. some high yield bonds) that the Fund invests in or if interest rates change.
  - **Investment grade bond risk** – Investment grade bonds are assigned ratings within the top rating categories by rating agencies (including but not limited to Fitch, Moody’s and/or Standard & Poor’s) on the basis of the creditworthiness or risk of default of a bond issue. Rating agencies review such assigned ratings and bonds may therefore be downgraded in rating if economic circumstances (e.g. subject to market or other conditions) impact the relevant bond issues. Downgrading of the bonds may adversely affect the value of the relevant bonds and therefore the performance of the Fund. The Fund may or may not be able to dispose of the debt instruments that are being downgraded. Also, the Fund may face higher risks of default in interest payment and principal repayment. As a result, investors may get back less than they originally invested.
  - **Credit risk** – If the issuer of any of the securities in which the Fund’s assets are invested defaults, the performance of the Fund will be adversely affected and the Fund could suffer substantial loss. For debt securities, including covered bonds, a default on interest or principal may adversely impact the performance of the Fund. Decline in credit quality of the issuer may adversely affect the valuation of the relevant bonds and the Fund. The credit ratings assigned by credit rating agencies are subject to limitations and do not guarantee the creditworthiness the security and/or of the issuer at all times.
  - **Sovereign debt risk** – The Fund’s investment in debt securities issued or guaranteed by governments may be exposed to political, social and economic risks. In adverse situations, the sovereign issuers may not be able or willing to repay the principal and/or interest when due or may request the Fund to participate in restructuring such debts. The Fund may suffer significant losses when there is a default of sovereign debt issuers.
  - **Interest rate risk** – Interest rates in the countries in which the Fund’s assets will be invested may be subject to fluctuations. Any such fluctuations may have a direct effect on the income received by the Fund and its capital value. Bonds are particularly susceptible to interest rate changes and may experience significant price volatility. The prices of bonds generally increase when interest rates decline and decrease when interest rates rise. Longer term bonds are usually more sensitive to interest rate changes. As a result, investors may get back less than they originally invested.
  - **Valuation risk** – Valuation of the Fund’s investments may involve uncertainties and judgmental determinations. If such valuation turns out to be incorrect, this may affect the net asset value calculation of the Fund.
  - **Asset-backed securities (“ABS”) and mortgage-backed securities (“MBS”) risk** – ABS and MBS are securities that entitle the holders thereof to receive payments that are primarily dependent upon the cash flow arising from a specified pool of financial assets. These securities may be highly illiquid and prone to substantial price volatility. The obligations associated with these securities may be subject to greater credit, liquidity and interest rate risk compared to other debt securities such as government issued bonds. ABS and MBS are often exposed to extension, prepayment risks and risk that the payment obligations relating to the underlying asset are not met (i.e. collateral risk), which may have a substantial impact on the timing and size of the cash flows paid by the securities and may negatively impact the returns of the securities.
- **Concentration risk** – The Fund may be concentrated in a limited number of countries, sectors or issuers and as a result, may be more volatile than more broadly diversified funds, and the Fund may be adversely impacted.
- **Convertible securities risk** – Convertible securities have characteristics of both debt and equity securities and carry credit, default, equity, interest rate, liquidity and market risks. A convertible security acts as a debt security and generally entitles the holder to receive interest paid or accrued until the convertible security matures or is redeemed, converted or exchanged. Before conversion, convertible securities generally have characteristics similar to both debt and equity securities. The value of convertible securities tends to decline as interest rates rise and, because of the conversion feature, tends to vary with fluctuations in the market value of the underlying securities. Convertible securities are usually subordinated to comparable nonconvertible securities. Convertible securities generally do not participate directly in any dividend increases or decreases of the underlying securities, although the market prices of convertible securities may be affected by any dividend changes or other changes in the underlying securities. Convertible securities are subject to the risks associated with both debt and equity securities, and to risks specific to convertible securities, including prepayment risk. Investors should be prepared for equity movement and greater volatility than straight bond investments, with an increased risk of capital loss.
- **Currency risk** – Where the base currency of the Fund varies from the investor’s home currency or where the base currency of the Fund varies from the currencies of the markets in which the Fund invests, there is the prospect of additional loss to the investor greater than the usual risks of investment. Also, changes in exchange rate controls and movements in currency exchange rates can adversely affect the return of the investment and as a result, investors may get back less than they originally invested.

Product Key Facts - JPMorgan Funds - Income Fund  
產品資料概要 - 摩根基金－環球債券收益基金

- **Derivative risk** – The Fund may acquire derivatives, including over-the-counter derivatives, and may therefore be subject to the risk that its direct counterparty will not perform its obligations under the transactions and that the Fund will sustain losses. Valuation of derivatives may involve uncertainties. If valuation turns out to be incorrect, they may affect the net asset value calculation of the Fund. Other risks associated with derivatives include liquidity risk, volatility risk and over-the-counter transaction risk. A small movement in the value of the underlying asset can cause a large movement in the value of the derivatives and therefore, investment in derivatives may result in losses in excess of the amount invested by the Fund and may lead to significant losses by the Fund.
- **Hedging risk** – The Investment Managers are permitted, in their absolute discretion, but not obliged, to use hedging techniques to attempt to reduce market and currency risks. There is no guarantee that hedging techniques if used, will achieve the desired result nor that hedging techniques will be used, in those cases, the Fund may be exposed to the existing market and currency risks and may be adversely impacted. The hedging, if any, against foreign exchange risks may or may not be up to 100% of assets of the Fund.
- **Distribution risk** – There is no assurance on a distribution or the frequency of distribution or distribution rate or dividend yield.
- **Payment of distributions out of capital risk** – The Fund may at its discretion pay dividends out of capital. The Fund may also at its discretion pay dividends out of gross income while charging all or part of the Fund's fees and expenses to the capital of the Fund, resulting in an increase in distributable amount for the payment of dividends and therefore, effectively paying dividends out of realised, unrealised capital gains or capital. Investors should note that, share classes of the Fund which pay dividends may distribute not only investment income, but also realised and unrealised capital gains or capital. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment, as a result, the capital that the Fund has available for investment in the future and capital growth may be reduced. Any dividend payments, irrespective of whether such payment is made up or effectively made up out of income, realised and unrealised capital gains or capital, may result in an immediate reduction of the net asset value per share. A positive distribution yield does not imply a positive return on the total investment. The distribution amount and NAV of the currency hedged class may be adversely affected by differences in the interest rates of the denominated currency of the currency hedged class and the base currency of the Fund, resulting in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-hedged classes.
- **Class currency risk** – The share class currency may be different from the Fund's base currency, the currencies of which the Fund's assets are invested and/or investors' base currencies of investment. If an investor converts its base currency of investment to the share class currency in order to invest in a particular Class and subsequently converts the redemption proceeds from that share class currency back to its original base currency of investment, the investor may suffer a loss due to the depreciation of the share class currency against the original currency. For example, if an investor whose base currency of investment is Hong Kong dollars (i.e. not USD) and chooses to invest in the USD Class, the investor may be exposed to a higher currency risk. The investor may suffer a higher loss as a result of exchange rate fluctuations between Hong Kong dollars and USD upon the reconversion of its USD investment back to Hong Kong dollars as compared to an investor whose base currency of investment is originally in USD.
- **Currency hedged share classes risk** – Investors should be aware that the currency hedging process may not give a precise hedge and there is no guarantee that the hedging will be totally successful. Investors in the currency hedged share classes may have exposure to currencies other than the currency of their share class and may also be exposed to the risks associated with the instruments used in the hedging process.
- **RMB currency risk** – RMB is subject to a managed floating exchange rate based on market supply and demand with reference to a basket of foreign currencies. RMB exchange rate is also subject to exchange control policies. The daily trading price of RMB against other major currencies in the inter-bank foreign exchange market is allowed to float within a narrow band around the central parity published by the relevant authorities of the People's Republic of China. As the exchange rates are influenced by government policy and market forces, the exchange rates for RMB against other currencies, including US dollars and HK dollars, are susceptible to movements based on external factors. Accordingly, the investment in share classes denominated in RMB may be adversely affected by the fluctuations in the exchange rate between RMB and other foreign currencies.  
  
RMB is currently not freely convertible and RMB convertibility from offshore RMB (CNH) to onshore RMB (CNY) is a managed currency process subject to foreign exchange control policies of and restrictions imposed by the government of the People's Republic of China.  
  
Share classes denominated in RMB will generally be valued with reference to RMB (CNH) rather than RMB (CNY). While RMB (CNH) and RMB (CNY) represent the same currency, they are traded in different and separate markets which operate independently. As such RMB (CNH) does not necessarily have the same exchange rate and may not move in the same direction as RMB (CNY). Any divergence between CNH and CNY may adversely impact investors.

Share classes denominated in RMB participate in the offshore RMB (CNH) market, which allow investors to freely transact CNH outside of mainland China. Share classes denominated in RMB will have no requirement to remit CNH to onshore RMB (CNY). Non-RMB based investors (e.g. Hong Kong investors) in share classes denominated in RMB may have to convert HK dollars or other currencies into RMB when investing in share classes denominated in RMB and subsequently convert the RMB redemption proceeds and/or distributions (if any) back to HK dollars or such other currencies. Investors will incur currency conversion costs and may suffer losses depending on the exchange rate movements of RMB relative to HK dollars or such other currencies. Also, there can be no assurance that RMB will not be subject to devaluation and any depreciation of RMB could adversely affect the value of the investor's investment in the Fund.

There is a risk that payment of redemption monies and/or distributions in RMB may be delayed when there is not sufficient amount of RMB for currency conversion for settlement of the redemption monies and/or distributions in a timely manner due to the exchange controls and restrictions applicable to RMB. In any event, the redemption proceeds will be paid not later than one calendar month after the relevant Hong Kong dealing day upon receipt of a duly completed redemption request.

- **投資風險** — 本基金的投資組合的價值可能因以下任何主要風險因素而下跌，因此，閣下於本基金的投資可能蒙受損失。概不保證償還本金。
- **新興市場風險** — 新興市場可能需承受更高風險以及投資於較成熟的市場時一般不會涉及之特殊考慮因素，例如流通性風險、貨幣風險／管制、政治、監管及經濟不穩定、法律及稅務風險、未完全發展的託管及結算慣例、低透明度、較大的金融風險、政府對資金調回的限制或其他貨幣管制規例，以及可能出現大幅波動。對投資者而言，部分市場的風險可能較高，因此投資者須確保已了解所涉及的風險及信納該投資適合作為其投資組合的一部分。因此，投資者收回的金額可能低於其原本的投資額。
- **與債務證券相關的風險** — 本基金於債務證券之投資須承受以下風險：
  - **低於投資級別／未經評級投資之風險** — 本基金可投資於未經評級或獲國際認可評級機構評為低於投資級別之債務證券。因此，該等投資將承受較其他較高投資級別證券為高之信貸及流通性風險。於經濟下滑時，該等債券一般較投資級別債券價格跌幅更大，因其通常承受較高之發行人違約風險。當本基金投資的任何低於投資級別／未經評級債務證券（例如部分高收益債券）違約或如利率改變，本基金資產淨值或會下跌或受負面影響。
  - **投資級別債券風險** — 投資級別債券獲評級機構（包括但不限於惠譽、穆迪及／或標準普爾）於信用可靠性或債券發行的違約風險的基礎上給予屬於高評級界別的評級。信貸評級機構不時覆核該等評級。倘若經濟環境（如市場或其他狀況）影響有關債券發行，該等債券的評級可能因此下降。債券評級的下調或會對有關債券的價值及本基金之表現造成不利影響。本基金未必能出售被下調評級之債務工具。此外，本基金可能面對較高不獲履行支付利息及償還本金之責任的風險。因此，投資者收回的金額可能低於其原本的投資額。
  - **信貸風險** — 倘若本基金之資產所投資之任何證券之發行人違約，本基金之表現將會受不利影響及本基金可能須承受重大損失。至於債務證券（包括擔保債券），不履行支付利息或本金之責任或會對本基金之表現造成不利影響。發行人的信貸質素降低，或會對有關債券及基金之估值造成不利影響。信貸評級機構給予的信貸評級存在局限，並不保證證券及／或發行人在所有時候的信用可靠性。
  - **主權債務風險** — 本基金投資於由政府發行或擔保的債務證券，可能承受政治、社會及經濟風險。在不利情況下，主權發行人未必能夠或願意在到期應付時償還本金及／或利息，或會要求本基金參與該等債務的重組。主權債務發行人違約時，本基金可能蒙受重大損失。
  - **利率風險** — 本基金之資產所投資之一些國家之利率可能會有所變動。任何該等變動可能會對本基金所得之收益及其資本價值有直接影響。債券特別容易受到利率變動所影響，並且可能承受顯著的價格波動。債券的價格一般會隨利率下降而上升；隨利率上升而下跌。較長期債券通常對利率變動較為敏感。因此，投資者收回的金額可能低於其原本的投資額。
  - **估值風險** — 本基金的投資估值或會涉及不明朗因素及判定性的決定。倘若該等估值不正確，則可能影響本基金的資產淨值計算。
  - **資產抵押證券(ABS)及按揭證券(MBS)風險** — ABS與MBS屬於證券類，持有人獲取的收益主要視乎指定金融資產組合所產生的現金流。該等證券可能高度不流通及價格更易出現大幅波動。該等證券的相關責任可能承受較政府發行債券等其他債務證券較高的信貸、流通性及利率風險。ABS與MBS往往會面對延期風險、提前還款風險及未能履行相關資產付款責任之風險（即抵押品風險），因而可能對證券支付的現金流之時間和金額有重大影響，並可能對證券回報帶來負面效應。
- **集中之風險** — 本基金可能集中於國家，行業或發行人的數量有限，因此，可能會比更廣泛分散的基金較為波動，而基金可能會受到不利影響。
- **可換股證券風險** — 可換股證券具有債務及股票證券的雙重特色，並帶有信貸、違約、股票、利率、流通性及市場風險。可換股證券作為債務證券，通常賦予持有人權利，可收取所付或累計的利息，直至可換股證券到期或被贖回、轉換或交換。可換股證券被轉換前，通常具有類似債務及股票證券的特性。可換股證券的價值往往隨著利率上升而下降，以及基於轉換特性，可換股證券的價格亦因應相關證券市值的波動而變動。可換股證券的地位一般次於相若的非可換股證券。可換股證券一般不直接參與相關證券的任何股息增減，不過可換股證券的市價可能受到相關證券的任何股息變動或其他變化所影響。可換股證券需承受同時與債務及股票證券相關的風險，以及可換股證券的特定風險，包括提前還款風險。投資者應準備承擔股票波動及較其他債券投資更大之波幅，而資本損失之風險亦會增加。

- **貨幣風險** — 若本基金的基本貨幣與投資者所在地的貨幣不同，或本基金的基本貨幣有別於本基金投資的市場之貨幣，投資者可能蒙受較一般投資風險為高的額外損失。此外，外匯管制變更及貨幣匯率的變動可對投資回報構成不利影響，因此，投資者收回的金額可能低於其原本的投資額。
- **衍生工具風險** — 本基金可購入衍生工具，包括場外衍生工具，故可能須受制於其直接交易對象不履行其於交易項下的責任，以及本基金將承受損失的風險。衍生工具的估值或會涉及不明朗因素。倘若該等估值不正確，則可能影響本基金的資產淨值計算。與衍生工具相關的其他風險包括流通性風險、波動性風險及場外交易風險。相關資產價值的小變動可引致衍生工具的價格大幅波動，因此投資於衍生工具可能令損失超過本基金投資的款項並可能導致本基金蒙受重大虧損。
- **對沖風險** — 投資經理人獲准有絕對酌情權（但並非必須）採用對沖方法以嘗試減低市場及貨幣風險。概無保證該等對沖方法（如採用）將會達到預期之效果或該等對沖方法將獲得採用，在該等情形下，本基金可能需承受現有之市場及貨幣風險，並可能受到不利影響。對匯率風險所作出的對沖（如有）可能或未必高達本基金資產之100%。
- **分派風險** — 分派或分派頻率或分派率或股息收益率並不受保證。
- **從資本撥款作出分派之風險** — 本基金可酌情決定從資本中支付股息。本基金亦可酌情決定從總收入中支付股息，同時從本基金之資本中支付本基金的全部或部分費用及開支，以致本基金用作支付股息之可分派金額有所增加，而因此，本基金實際上可從已變現、未變現的資本收益或資本中支付股息。投資者應注意，本基金的支付股息股份類別不僅可從投資收入，亦可從已變現及未變現的資本收益或資本中支付股息。從資本中支付股息相當於退還或提取投資者部分原有之投資或任何歸屬於該原有投資的資本收益。因此，本基金未來可用作投資的資本及資本增值或會減少。從收入、已變現及未變現的資本收益或資本（不論從中或實際上從中）支付任何股息均可導致每股資產淨值即時減少。正分派收益並不表示總投資的正回報。貨幣對沖類別之分派金額及資產淨值可能受到貨幣對沖類別的計價貨幣與本基金的基本貨幣之利率差異的不利影響，導致從資本撥款支付分派的金額增加，繼而使資本被侵蝕的程度較其他非對沖類別為高。
- **類別貨幣風險** — 股份類別貨幣可能不同於本基金之基本貨幣及其所投資的資產之貨幣及／或投資者之投資的基本貨幣。倘若投資者將其投資之基本貨幣轉換為股份類別貨幣以投資於一特定類別，及於其後將贖回所得由該股份類別貨幣轉換至其原有之投資基本貨幣，投資者可能因該股份類別貨幣對該原有貨幣貶值而蒙受損失。舉例而言，倘投資者之投資基本貨幣為港元（即非美元）而選擇投資於美元類別，則該投資者可能承受較高的貨幣風險。與以美元為原有之投資基本貨幣的投資者相比，該投資者可能因在將其美元投資再轉換回港元時，港元與美元之匯率波動而蒙受較高損失。
- **貨幣對沖股份類別之風險** — 投資者注意，任何貨幣對沖過程未必作出精確對沖及概無保證對沖將完全成功。貨幣對沖股份類別的投資者或須承受其所持股份類別貨幣以外的貨幣風險，亦可能承受對沖過程中所使用工具之相關風險。
- **人民幣貨幣風險** — 人民幣匯率為一個受管理的浮動匯率，基於市場供求及參考一籃子外國貨幣而釐定。人民幣匯率亦受制於外匯管制政策。於銀行間外匯市場中人民幣兌其他主要貨幣之每日交易價格可按中華人民共和國之有關主管機構發佈的中央平價窄幅上落。由於匯率受政府政策及市場力量影響，人民幣兌包括美元及港元在內的其他貨幣的匯率將容易因外圍因素而變動。因此，投資於以人民幣計價的股份類別可能會因人民幣與其他外幣之間的匯率波動而受到不利的影響。

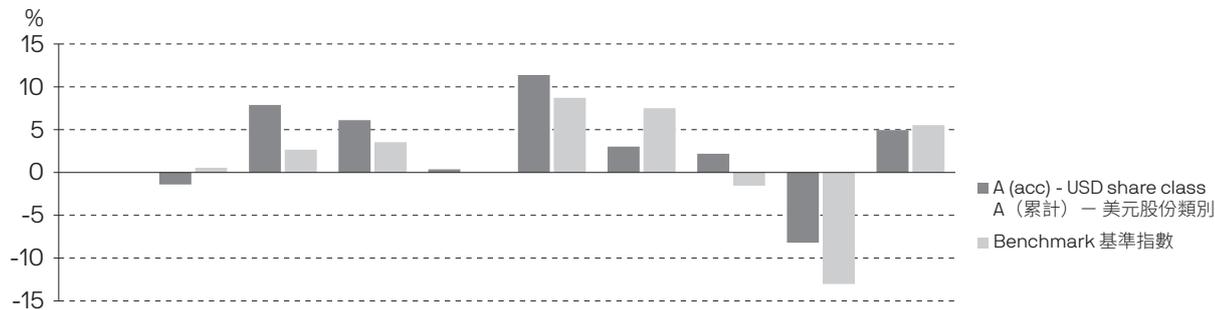

人民幣現時不可自由兌換。將境外人民幣(CNH)兌換為境內人民幣(CNY)是一項受管理的貨幣程序，須遵守由中華人民共和國政府實施的外匯管制政策及限制。

人民幣股份類別一般參考境外人民幣(CNH)而非境內人民幣(CNY)計價。境外人民幣(CNH)及境內人民幣(CNY)雖屬相同貨幣，但有關貨幣在獨立運作的不同的及各自的市場上買賣。因此，境外人民幣(CNH)與境內人民幣(CNY)的匯率未必相同，匯率走勢亦可能不一樣。CNH與CNY間出現任何差異，可能對投資者造成不利影響。

以人民幣計價的股份類別參與境外人民幣(CNH)市場，投資者可在中國內地境外自由交易CNH。以人民幣計價的股份類別毋須將CNH匯成境內人民幣(CNY)。並非以人民幣為基本貨幣的人民幣計價股份類別之投資者（如香港投資者），在投資以人民幣計價的股份類別時可能須將港元或其他貨幣兌換為人民幣，其後亦須將人民幣贖回所得款項及／或人民幣分派（如有）兌換為港元或該等其他貨幣。投資者將招致匯兌成本，並可能蒙受損失，視乎人民幣相對於港元或該等其他貨幣的匯率走勢而定。此外，概不能保證人民幣不會貶值，而人民幣的任何貶值可能對投資者於本基金的投資價值造成不利影響。

如因人民幣適用的外匯管制及限制而未能具備足夠的人民幣進行貨幣兌換以及時結算贖回款項及／或分派，存在以人民幣支付的贖回款項及／或分派或會被延誤的風險。無論如何，贖回所得款項將於接獲正式填妥之贖回要求之有關香港交易日後一個曆月內支付。
