

Performance, Portfolio Breakdowns and Characteristics, and Net Assets as at 31-Mar-2024.

IMPORTANT:

- The Fund's investments in equities could incur significant losses due to higher fluctuation of equity values. The Fund's investments are concentrated in the gold and precious metals sector. This may result in greater volatility than more broad-based investments.
- The Fund is subject to currency risk, emerging market risk, foreign investments restrictions risk, small-cap companies' volatility and liquidity risks and contingent convertible bonds risk.
- **Class 10 Shares** pay dividends gross of expenses and/or from capital at the Directors' discretion. Paying dividends gross of expenses may result in more income being available for distribution; however these shares may effectively pay dividends from capital – may amount to a partial return or withdrawal of an investor's original investment or capital gains. All declared dividends result in an immediate reduction in the NAV price of the share class on the ex-dividend date.
- The Fund may use derivatives for hedging and for investment purposes. However, usage for investment purposes will not be extensive. The Fund may suffer losses from its derivatives usage.
- The value of the Fund can be volatile and can go down substantially within a short period of time. It is possible that a certain amount of your investment could be lost.
- Investors should not make investment decisions based on this document alone. Investors should refer to the Prospectus and Key Facts Statement for details including risk factors.

INVESTMENT OBJECTIVE

The World Gold Fund seeks to maximise total return. The Fund invests globally at least 70% of its total assets in the equity securities of companies whose predominant economic activity is gold-mining. It may also invest in the equity securities of companies whose predominant economic activity is other precious metal or mineral and base metal or mineral mining. The Fund does not hold physical gold or metal.
