Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

PostFinance Fonds Global, share class I (ISIN: CH0495604081)
This collective investment scheme is managed by UBS Fund Management (Switzerland) AG, a wholly owned Group company of UBS Group AG.

Objectives and Investment Policy

Post Finance Fonds Global holds units of collective investment schemes that invest globally in equities of leading companies. The fund invests 25% each in Switzerland, North and South America, Europe and the Pacific including emerging markets. The foreign currency allocation averages approximately 75%. Investments are passively managed, i.e. they replicate a benchmark, and are rebalanced back to their original weightings each month.

In general, investors may demand the redemption of their units from the fund management company on any stock exchange trading day.

The fund’s income remains in the fund (reinvested).

Recommendation: This collective investment may not be suitable for investors planning to withdraw their monies from the collective investment within a period of at least nine years.

Additional information about this category
- The risk indicator is based on the volatility of returns over the past five years. The method used for this estimate depends on the type of fund.
- Past returns are not indicative of future performance.
- The risk category shown is not guaranteed and may vary over time.
- The lowest risk category does not mean ‘risk-free’.

Why is this fund in category 6?
The fund is in risk category 6 because the volatility of its returns is very high.
The fund invests in equities and may therefore be subject to high volatility. This requires an elevated risk tolerance and capacity. The value of a unit may fall below the purchase price. The value of a unit may be influenced by currency fluctuations.

Further material risks:
- The fund can invest in less liquid assets that may be difficult to sell in distressed markets.
- The fund may use derivatives which can reduce investor risks or give rise to market risks as well as potential loss due to failure of counterparty.
- Operational risks and custody risks: The fund is subject to risks through operational or human error that may arise at either the asset management company or a custodian or other third parties.
- Each fund is exposed to specific risks. You can find additional details related to the fund in the prospectus.
